PROJECTS

1. Hotel Listings Website (Full Stack, MERN) – Inspired by Airbnb

Developed a responsive full-stack web application for hotel/property listings using MongoDB, Express.js, React.js, and Node.js.

- Implemented user authentication, property uploads, booking features, and reviews.
- Designed a clean UI HTML and CSS styled-components.
- Enabled CRUD operations for listings and user accounts with secure JWT-based login.
- Easy to understand code using MVC model .

2. Weather App (HTML, CSS, JavaScript, Weather API)

Built a real-time weather forecasting web app using JavaScript and OpenWeatherMap API.

- Users can search for any city to view current weather, temperature, humidity, and conditions.
- Responsive UI with dynamic weather icons and background changes based on weather type.
- Used Fetch API to retrieve and display real-time data.

KEY ACHIEVEMENTS

Accomplished
Successfully built and deployed a full-stack hotel listing website inspired by Airbnb using the MERN stack.

Dedicated
Completed 150 hours of hands-on coding and project-based learning in web development.

Goal-oriented
Continuously learning and practicing data structures and algorithms to strengthen problem-solving skills.

SKILLS

Front-end stack

| HTML | DOM | CSS | JS | EJS |
| React | UX | UI | Bootstrap |

Back-end stack

| SQL | REST | JSON | APIs |
| Node.js | Express.js |

Data

| MongoDB | AWS | Mongoose |
| MySQL |

Development & Operations

| GIT | Render | C++ | Cloudinary |
